barbaric

Wood handling

uniWood UWL3 PILITIN WOOD UNI

Our standard lifter series for most commonly used wood board materials. Next to their lightweight and compact build these lifters convince with great ergonomics and maximum safety.

With its 90 ° tilting function, our uniWood 3 is particularly versatile in the field of wood production, as boards can be manipulated both upright and horizontal. The lifter also

uniWood 3 is also ideal for handling air-permeable panels (OSB, and materials with a slightly textured surface.

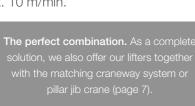

Other features

uniWood

lifter series

- > Adjustable control handle
- > compact design and low build height
- > Load capacity: max. 250 kg
- > Special operation handle for one-hand operation
- > Hoist: continuously, max. 10 m/min.

Also available in the version UWL 1 without tilt function

The standard lifter for wood handling

impresses with its light, slim design and particularly easy operation. In addition to most commonly used coated wood materials, the chipboard, MDF over 8 mm thickness)

uniWood UWL3S

The perfect complement for manipulating plates at the edgebander.

Panel handling made easy

With its slim and compact design with low mass the uniWood 3S is ideal for quick handling of plates on all processing machines.

The load suspension with only one suction cup allows the lifting of parts of all sizes. Also structured and glossy surfaces can be gripped easily and without damage.

Included is a 90° tilting device for vertical picking up and placement of the parts.

Universally applicable

With this system, the feeding of edgebanders and stationary panel saws with only one operator is possible.

The uniWood 3S is an ideal complement for handling of large special parts that can not be transported by the standard return system.

- > Load capacity: max. 200 kg
- > Special operation handle for handling by one hand
- > Hoist: continuously, max. 10 m/min.

uniWood UWL5

The special handling system with narrow construction for vertical and horizontal transport of doors.

Characteristics

- > Tilting of parts 180° horizontal
- > Continously variable tilting speeds
- > Complete handling system with lifting gear
- > One-handed operation through ergonomic handle
- > Continous and smooth movements
- > Manual adjustment of the center of gravity

Technical data

- > Load capacity: 220 kg / 250 kg
- > Tilting speed: approx. 6 sec./90°
- > Size of sution cups: 4x or 6x 377 x 81 mm Special versions on request
- > Lifting speed: 0-10 m/min continously variable through frequency converter
- > Lifting height: approx. 2.0 m
- > Operating voltage: 230 V / 50 Hz

Special 180° tilting function for part flipping

Safety

The ultimate safety innovation for all Barbaric handling systems.

Also available as an **UPGRADE KIT for existing** handling solutions!

An innovative Upgrade for your handling system.

The SafetyKit vastly increases user safety and adds a wide range of other features to the handling system as well.

The main advantages at a glance:

- > Eco-Mode (Compressed air saving function)
- > Maximum safety for the operator
- > Pressure and vacuum monitoring
- > Weight sensor for load control
- > Automatic test of suction performance
- > Detailed error reports & statistical analysis
- > Service and maintenance reminders

Brand new options for 2020 SafetyKit models:

- > Automatic suction start while approaching the glass
- > Suction cup switch-off and automatic reduction of maximum weight

SWL plankLifter

Handling of cut or dried planks.

The special lifting device for moving whole posts, KVH, sections such as squadrons or rough sawn boards by a server.

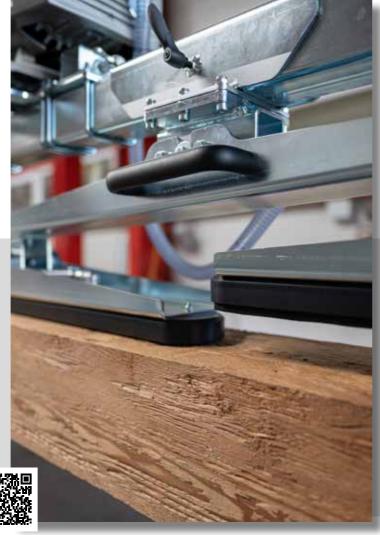

Delivery incl. chain hoist or for hooking into an on-site hall crane.

Power supply by supply to the customer's indoor crane (400 V, 3 phases) due to the built-in transformer possible. Thus, no additional cable is necessary. The control can be carried out via a control handle, wired or by radio.

Technical data

- > Load capacity: up to 1500 kg
- > Operating voltage: 230 V / 50 Hz or (400 V / 50 Hz via transformer)
- > Functions are displayed by means of lamps and pressure gauges

Special solutions, for example: Control via customer crane operation and higher working loads on request.

Product info

Crane- and craneway systems

Crane/
Craneway
SYSTEMS

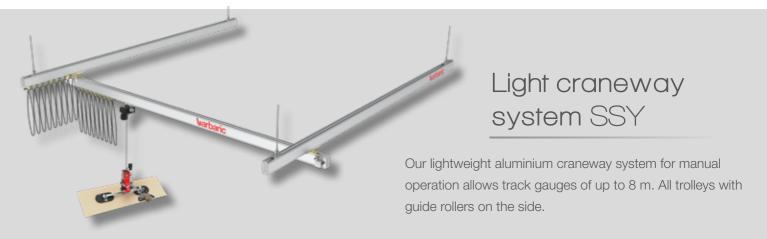

Combining high performance with ease of use. Our crane systems are specifically designed and built for handling tasks.

Pillar jib crane SSK

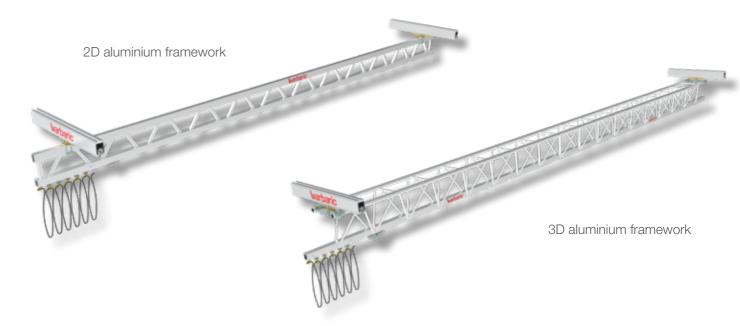

Slewing crane systems in lightweight construction for all working loads

and arm lengths. On request with enlarged mounting plate.

Bridges with framework construction

RWL rackLifter

Storage and retrieval of panels out of a shelf rack on the standing panel saw.

Design

- > rail system with dual bridge construction
- > lift mast rotating 360°
- > lightweight aluminium profiles as carriage guideways
- > special lifting traverse for panel separation

Electrical control

All control elements are located in our unique control handle. Separate holds on the framework are used for manipulator guiding and rotating.

Security features

The system is equipped with a security unit avoiding unintentional release of the load. Panels only can be released when the weight of the panel is supported by the rack shelf or another plain surface. For additional safety a pressure gauge and an alarm horn are installed on the device.

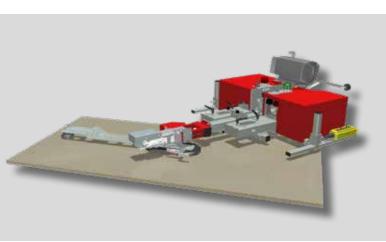

SWL forkLifter

Manipulator for use on all standard pallet trucks and forklifts.

Ideal for large manipulation areas and maximum mobility for handling panels or parts.

Design: Built in batteries for power supply and fork fixation clamps for a strong secure hold.

- > Incl. 90° tilt mechanism
- > 90° manual turning function
- > Load capacity: max. 100 kg
- > Optional: electrical turning 90°
- > Optional: Increased load capacity to max. 250 kg

Technical data

> Load capacity: max. 100 kg > Lifting speed: max. 10 m/min (continously variable due to frequency conversion)

> Vacuum generation: with electrical vacuum pump $(25 \text{ m}^3/\text{h})$

230 VAC / 50 Hz > Operating voltage:

90° > Tilting device:

> Rotating device: 90° (manual rotation)

> Span: up to 12 m > Lifting height: up to 8 m

360° rotatable, not endless > Lifting mast: > Display on the operating handle - camera mounted on the lifting carriage

Optional features

- > Increased load capacity to 250 kg
- > Vacuum generation: by ejector (6 bar compressed air required)
- > Endless turning of the lifting mast
- > Electrically driven crane bridge
- > Pneumatic brake for turntable (6 bar compressed air required)
- > Custom made beams
- > Electric turning 90 °

Special beams and suction traverses

We offer a suitable lifting beam for every application.

Suction beam for thin boards

Working load 150 kg. With 4 suctions cups \emptyset 270 mm on an adjustable beam (beam size: 1500 x 800 mm) for thin dense boards, PVC, aluminium, metal, melamine. Not suitable for MDF and permeable chipboard panels.

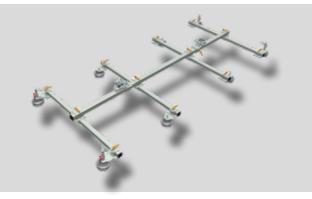

Cross beam for doors

Working load 150 kg. With 4 oval suction cups 377×81 mm on an adjustable beam - Spreader for doors with glass section (beam size 1500×1200 mm).

Cross beam for iron sheets and acrylic glass

Working load 150 kg. With 8 bellow suction cups Ø 115 mm on an adjustable beam − Suction beam with extra length for thin parts. (beam size: 2500 x 1200 mm). The outer suction cups are lockable for lifting of smaller plates.

Service & After-Sales

Quality, efficiency and innovation - three keywords that apply specifically to Barbaric's service competence. The employees of our service hotline have been with us for many years and

have excellent knowledge of our products

They will be happy to help you - no matter whether it is a spare part, maintenance or service request.

WE ARE THERE FOR OUR CUSTOMERS - EVEN YEARS AFTER THE SALE.

Barbaric - your competent partner for any vacuum handling application

Automatic panel and part handling

Our intelligent solutions are used by many customers around the globe.

- > Panel storage systems
- > Feeding systems
- > Buffer storage
- > Return systems

are just a few examples of modern systems in the field of material handling. Each system in this area is built individually according to our customers' requirements, while existing components and proven concepts are used.

Manual handling solutions

For customers in the wood, glass industry or for construction site use, we offer the suitable lifting equipment.

Barbaric provides optimal handling solutions for safe and ergonomic lifting applications.

Manual vacuum lifters from Barbaric enable efficient handling of heavy panels or glass and save valuable time in production. Heavy lifting tasks can be performed effortlessly by just one operator. By purchasing suitable handling solutions, sickness-related absences can be minimized and attractive jobs created for the employees.

All rights are reserved by Barbaric GmbH, also in the case of property right applications. Subject to technical changes. Technical changes and errors excepted.
